Seattle, WA 98121

On behalf of BP Cherry Point Refinery, the Turnaround Procurement Team would like to recognize you and the entire Steady Flux team for their efforts supporting our 2012 spring shutdown.

We knew when we asked you to design and build a one-of-a-kind tool to inspect heater tubes in less than 4 months we were asking a lot. When a fire at the refinery accelerated the schedule by 6 weeks, we asked for the near impossible. And we got it.

Through the entire process you demonstrated great expertise, patience and professionalism, not to mention flexibility. You found a way to expedite long lead materials and overcome design challenges to deliver a tool that not only worked, it worked well.

As a token of our thanks for your services we would like to present this letter of appreciation to you for all you extraordinary efforts. Once again, we thank you for being a tremendous asset and being part of a successful shutdown.

Yours sincerely,
